Objective

As a skilled software developer **passionate about data-driven products, I'm seeking to deliver exceptional value to end clients**. Experienced in React, Node.js,Typescript and Jest my main goal is to join an innovative problem-solving team and exceed clients expectations

Employment History

Sênior Software Developer, Willbank, Remote

SEPTEMBER 2022 — APRIL 2023

- At my last team I worked with Flutter, and several languages at the back-end. Our goal is to generate value to the account part of the bank through experimentation culture. We use events(GA), feature flags, and information of the client to measure the success of the experience or to be active on a rollback.

Sênior Software Developer, Thoughtworks, Remote

NOVEMBER 2020 — AUGUST 2022

- At my last project at Thoughtworks, as a Tech Lead its my responsibility to understand the microservices architecture, unblock developers with coding help and support and direct developers technical career
- At my first project at Thoughtworks, as a developer and consultant we helped the client with any digital solution. We used Node JS with Typescript for BFFs (Backends-for-Frontends), React with Typescript as well for Microfrontends to develop digital solutions for a multinational beauty products company.

Software Developer, Arizona Marketing Flow, São Paulo

OCTOBER 2016 — AUGUST 2020

- Arizona had a product called Visto with modules: DAM, PIM and BPMN. To automate processes (BPMN - Camunda Integration) we used at the Frontend: ReactJS (Redux), Webpack, ES6/7 and for Unit Tests we used AVA/Jest

Software Developer, Kahuso, Inc, Toronto

APRIL 2016 — SEPTEMBER 2016

- Kahuso Inc. had a plataform to match companies with executives. To develop new features and maintain our frontend we use ReactJS (Flux), SASS, Gulp and ES5/6.

Education
